## BLOOM &amp; FLOWER

## FOR HEMP PRODUCTION

**Monty's Hemp Pro Bloom & Flower** is a concentrated, liquid plant food that can be used as a foliar on hemp during the reproductive stage when oil production and yield are the goals.

- May be used with other nutrient products for additional response
- Low salt, pH balanced, safe and easy to apply. Will not burn and is non-corrosive
- Tank-mix flexible – can be applied with most herbicides, pesticides and fungicides
- Designed utilizing orthophosphoric acid (phosphoric acid) for rapid availability

### 3-15-16 GUARANTEED ANALYSIS

Total Nitrogen (N)	3%
1% Ammoniacal Nitrogen

**Monty's Hemp Bloom & Flower** is a liquid plant food that is recommended as a supplement to your current fertilizer program and is not recommended to replace the nutrients typically added to the soil. We suggest taking a soil test and have a qualified independent lab analyze the samples to determine nutrient levels in your soils and then follow recommended applications to ensure proper nutritional levels.

### APPLICATION RATES

Standard dilution for foliar applications is 32 ounces diluted in a minimum of 15 gallons of water per acre. The frequency of application can be from 1 to 3 times during the reproductive stage, with no fewer than 7 days between applications.

### STORAGE AND HANDLING

Keep container closed when not in use. This product contains organic materials which may settle and should be shaken or stirred if stored. Refer to the SDS for other safety and handling information. Once mixed or diluted, product should be used within 48 hours.

Information regarding the contents and levels of metals in this product is available on the Internet at: <http://www.aapfco.org/metals.htm>

### USE OF MONTY'S PLANT FOODS WITH FARM CHEMICALS

Monty's products are designed specifically for fertility enhancement purposes. Monty's products are compatible with many farm chemicals. When tank mixing any Monty's products with other farm chemicals, always read and follow the label directions of the chemical(s) you are considering. Monty's suggests administering a jar test and/or a strip test before adding Monty's to your tank mix. When mixing with other farm chemicals, it is suggested to tank mix Monty's only after diluting the chemical according to label directions. Knowing the chemical's "mode of action" (block photosynthesis) or metal content (copper based) will help determine the compatibility of Monty's. Please call 800-978-6342 with any questions.

### LIMITED WARRANTY

Monty's warrants that this product meets its manufacturing specifications. If it does not, Monty's will, at its option, replace the product or refund the purchase price. In no event shall Monty's be liable for special, incidental or consequential damages or for damages in the nature of penalties. Monty's shall not be liable in any way for claims resulting from any use of this product which is not in strict accordance with all directions, cautions and warnings on the label or labels.
