DIRECTIONS FOR USE

Apply only as directed during the growing season.

For use on turf, including greens, tees, fairways, roughs, sports turf and other fine turf areas where a potassium fertilizer is desired or when certain micronutrients are needed to help correct or prevent deficiencies.

Applied to saline-sodic soils, this product will loosen the heavy, hard-packed soil, allowing water and air to penetrate and move freely in the soil.

Apply at 5-10 lbs. per 1,000 sq. ft. (218 - 435 lbs. per acre), while the turf is actively growing.

Application to wet, close-cut turf may result in foliar staining, which will discolor the turf to a brown/black appearance. This will occur even if immediate irrigation or rainfall occurs. Be sure to apply this product to dry turf only.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.

Watering directions

- Immediately after application, apply a minimum of 0.2 inches of water to disperse particles into the root zone. Due to variations in temperature and water pH, best results are achieved by splitting the irrigation into 2 applications at 10-15 minutes apart. This will allow for more thorough particle dispersion into the root zone.
- Particle color may vary from lot to lot.

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will also greatly reduce ball, shoe and mower pickup.

| Lbs. per acre | Lbs. per 1,000 sq. ft. | K ₂ O | Ca | Mg | S | Mn |
|---------------|------------------------|------------------|-------|-----|------|-------|
| 218 | 5 | 0.65 | 0.525 | 0.1 | 0.74 | 0.075 |
| 435 | 10 | 1.30 | 1.050 | 0.2 | 1.50 | 0.150 |
