In Virginia, this lawn fertilizer, which contains phosphate, is intended only for nonagricultural use on (i) turf during its first growing season, (ii) turf areas being repaired or renovated, and (iii) turf where a soil test performed within the last 3 years indicates a phosphate deficiency. This fertilizer is not intended for the routine maintenance of turf.

Soil Injection Rates:

Arbor Care should be injected into the top 4-8 inches of soil where feeder roots extend. Start application of fertilizer approximately 2-3 feet from tree trunk and extend the same distance beyond the drip line. A grid pattern should be laid out, and spacing should be every 2½ ft to a depth

of 4-8 inches. A volume of 2-5 gallons tank mix should be applied per inch of tree diameter. Inject approximately ½ gallon of fertilizer solution at each point.
